

Aleksandr Meliksetyan

UI/UX DESIGNER

Yerevan, Armenia / +374 91 532 933 / meliksetyanaleksandr@gmail.com / [LinkedIn](#) / [Behance](#)

UX/UI designer with 4+ years of experience turning ideas into digital products that serve users and business goals alike. I start from research, ground every decision in evidence I can explain and design systems and interfaces that hold up in production - accessible, consistent and easy for teams to build on.

EXPERIENCE

UI/UX Designer - Informational Systems Agency of Armenia (ISAA)

March 2026 - Present

- Design public-sector digital services used at national scale, balancing accessibility requirements with clarity.
- Improved the agency design system: refined existing foundations and added new components for product teams.
- Ran design audits across products, covering accessibility testing (WCAG) and design-system compliance.

UI/UX Designer - Bizzy Agency

July 2025 - Present

- Designed the full Bizzy Agency website: modern UI, clean visual identity and a conversion-minded structure.
- Built the complete admin panel interface, including data-dense views and responsive layouts.
- Delivered a scalable component system shared across the marketing site and the admin product.

UI/UX Designer - Independent & project work

December 2022 - July 2025

HayWay - taxi mobile app, end-to-end

- Ride-hailing concept for the Armenian market, tackling confusing payments, fare splitting and scheduling.
- Ran personas, journey mapping and feature prioritisation to define MVP scope; designed flows, wireframes and prototypes.
- Shipped a booking flow with transparent pricing and shared fares on a reusable component library.

Skatey - e-commerce website

- Online skate store concept built to make product discovery simple for beginners and pros alike.
- Market and competitor analysis into personas and journey maps; clear category navigation, prototypes and a flexible design system.

SKILLS
